- **Back end:** Node.js, Express.js, MySQL, Sequelize ORM, NoSQL, MongoDB, Mongoose ODM
- **Tools:** Git, Github, Gitlab, Heroku, VSCode, Adobe XD, Adobe PhotoShop, Adobe Illustrator
- **Concepts:** OOP, ORM, APIs, REST, MVC, JSON, TDD

PROJECTS

Rate My Bootcamp | www.whispering-scrubland-52233.herokuapp.com/

- Collaborative project with personal responsibilities in successful API routes, web design and CSS
- Interactive full stack RESTful application with user authentication and conditional capabilities
- Allows users to sign-up and log-in to read and create reviews for bootcamps and instructors
- Technologies used include Express.js, Handlebars.js, Sequelize, and bcrypt.js

E-Commerce Back-end Application | www.github.com/adairconlin/e-commerce-backend

- A back end for an e-commerce, given a working Express.js API and product data from a company
- Allows companies to organize and update their product data, and developers to view API routes
- Technologies used include MySQL, Sequelize, dotenv, and Insomnia

Food Mood | www.adairconlin.art/food-mood/

- Collaborative project with three other cohorts
- Application that returns and saves meals and cocktails for the user to make
- A group API project that uses Spoonacular API and TheCocktailDB API
- User data consists upon future user visits with localStorage

Portfolio Site | www.adairconlin.art/

- Front end portfolio site in order to display web development projects
- Built with HTML5, CSS, and some JavaScript for better user experience

EDUCATION

Certificate: Full Stack Web Development | Anticipated Graduation: March 2022
University of Minnesota Twin Cities

- Gain knowledge on web technologies such as Git and DevTools
- Applied OOP, ORM, and CMS concepts to several full stack projects
- Build full-stack applications using Node.js, Express.js, and MySQL
- Collaboration with several groups of peers in order to build successful full stack applications

Bachelors of Arts in Animation | August 2017 - May 2020
Minnesota State University Moorhead

- Graduated cum laude in May 2020
- Dean's list for Fall & Spring Semesters (2017-2019)
- Accomplished several 3D animation projects using 3DS Max and Autodesk Maya
